**Letter**

March 4, 1907.

My dear Professor Lawson:-

My original intention was to write short papers on the damage caused by the Eqke. and on the seismographical observations obtained at different stations. Since my return I have written a preliminary note on the latter subject (published in the "Bulletin", I, 1.) For the moment, however, I am not able to write accounts on other subjects.

I enclose a short paper on the comparison of the San Francisco Fault with those of Mino-Owari and Formosa earthquakes. If this note could be of any service to the Commission, I would be greatly pleased.

Yours very sincerely  
[F. OMORI]
