Letter to E.S. Larsen, Geological Dept. Univ. of Calif. Berkeley May 1, 1907

Letter

May 1, 1907.

Mr. E. S. Larsen

Geological Dept., University of California

Berkeley, Cal.

My dear Larsen:

Your letter of March 13, bearing a postmark dated April 24, reached me yesterday. I am much obliged for the information contained in the accompanying report, regarding Auburn, Davis, Woodland, and Colusa. The matter that I wrote you about several days ago is much more important than the visiting of the other towns in the list that I gave you, and if you should be pressed for time I should much prefer you to examine the ground between Wright's and Chittenden, and report to me as promptly as possible.

Yours sincerely
