Letter to Messrs. Hoen and Co. June 4, 1907

Letter

June 4, 1907.

Messrs. Hoen and Company

Baltimore, Maryland.

My dear Mr. Hoen:

I want very much to get away next week, and I would like to get color proofs of the geological and intensity maps of San Francisco this week. I have to answer some inquiries regarding the system of water pipes for San Francisco, which necessitates a reference to these maps, and I must attend to the matter before I get away.

I will be greatly obliged, therefore, if you will let me have those proofs. In fact, I think I ought to have proofs of all the maps you have for me, before going away, so that I can pass upon them and let you go ahead in my absence.

Yours sincerely
