Professor Otto Stern 759 Cragmont Avenue Berkeley 8, California

Dear Professor Stern:

The United Molecular Beamists of the world, now in session at Brookhaven, send you their greetings as the founding father of this exacting but rewarding discipline.

Your name has been referred to in reverence on many occasions in the two days of this meeting and we only regret that you were not present in person to hear your scientific great-grandsons expound your doctrine.

We all join in wishing you continued good health and good cheer and hope you may be able to come to our next meeting.

Sincerely,

J. D. Pali
